

Visualizing Symbiosis

EEOB 8896.05

Science Communication

Last 7-weeks SP2022

We will begin this seminar reading a chapter from *Braiding Sweetgrass* by Robin Wall Kimmerer where she describes beautiful complex lichens. Then we will read selected chapters from *The Symbiotic Habit* by Angela E. Douglas and *Mutualisms* edited by Judith L. Bronstein. While learning about symbioses we will discuss ways to visualize evolutionary and ecological concepts through descriptive analogies and conceptual figures.

Instructor:

Rachelle Adams

(adams1970@osu.edu)

Students will be asked to co-lead discussions and complete a conceptual figure relating to their field of research.

Time: TBD

1 credit
